

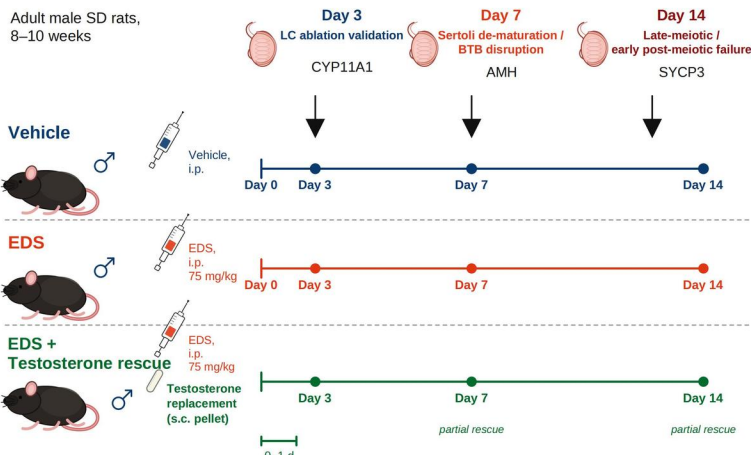

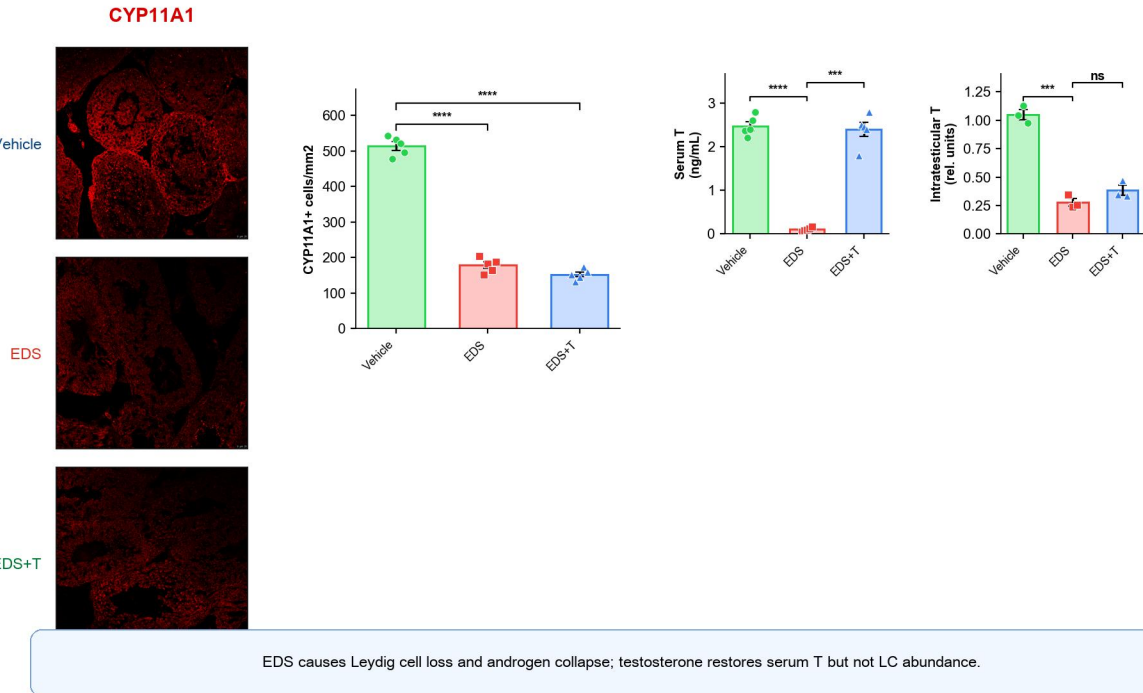

Figure 9 | In vivo validation of LC-ST-germ axis disruption by EDS and partial rescue by testosterone

动物验证：EDS 消融 Leydig 细胞后重建 LC-ST-germ 轴损伤

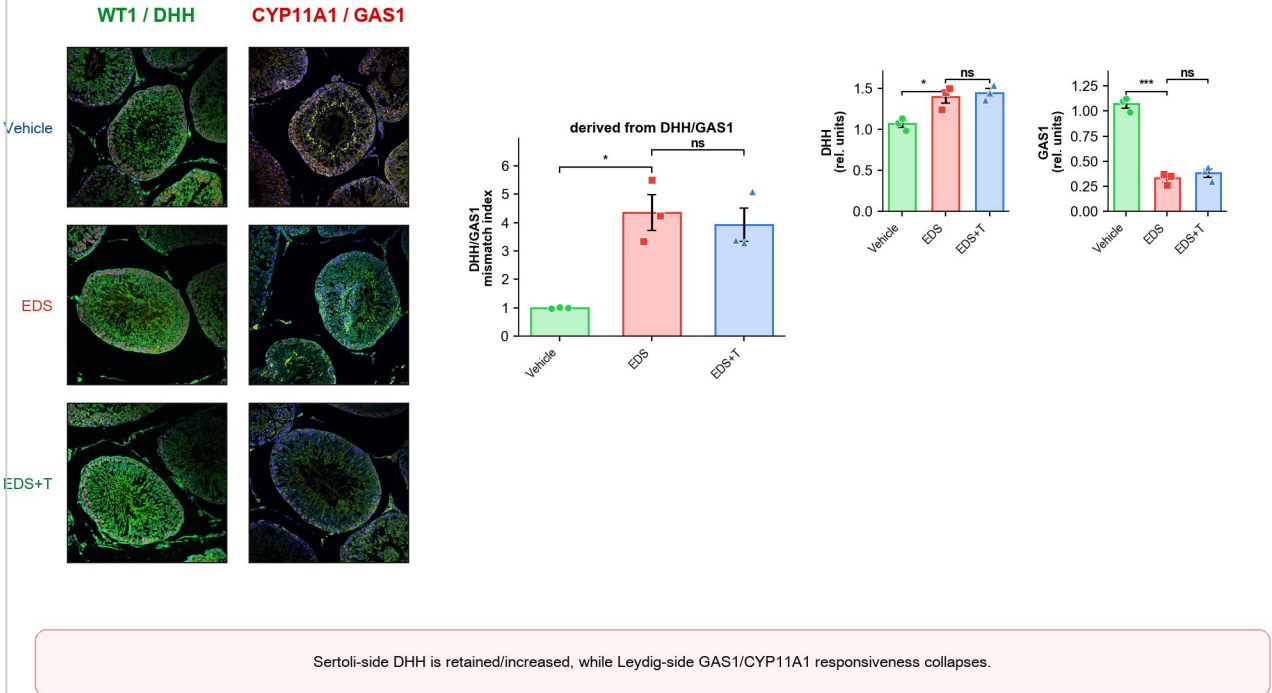

A Experimental design and timeline

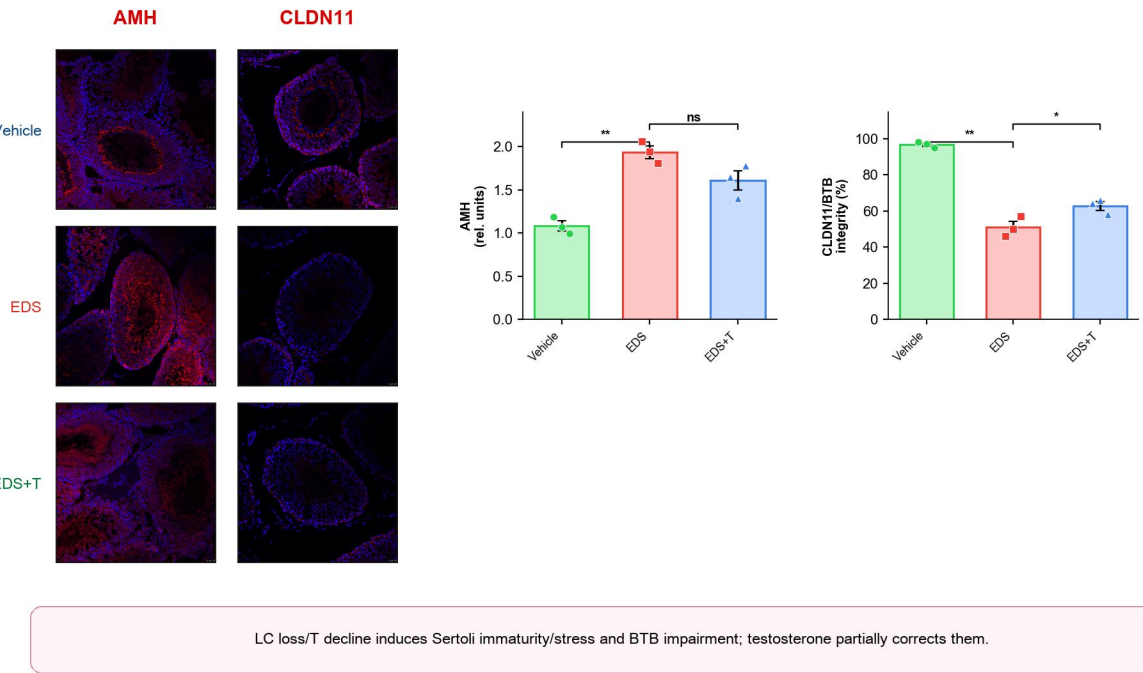

B Day 3 | Leydig cell ablation and androgen collapse

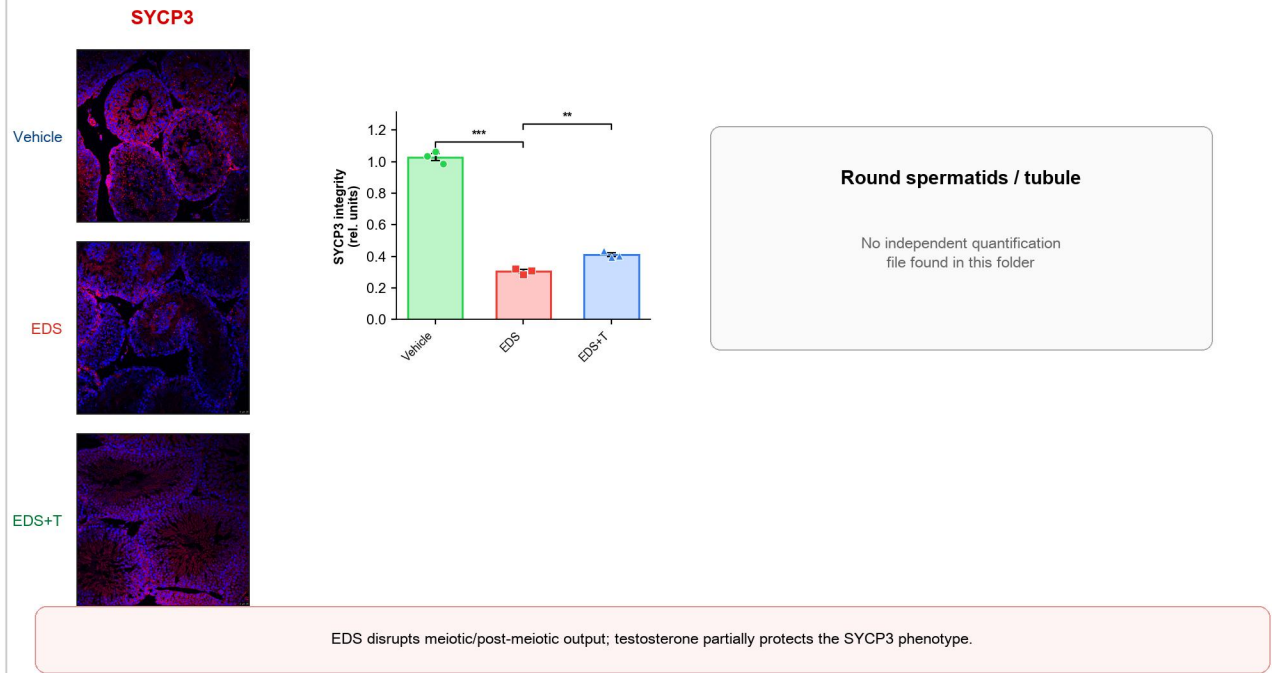

C Day 7 | Hedgehog (HH) mismatch

D Day 7 | Sertoli / BTB phenotype

E Day 14 | Germ-cell defect

F Mechanistic summary: EDS induces LC-ST-germ axis disruption with persistent HH mismatch
